Wapelaan, Feb 6th 1983

Dear Mr. Weisberg,

Maybe you remember my writing to you in 1980, I even bought a second copy of "Oswald in New-Orleans" directly from you. Two (almost three) years have passed since then and in the meantime I've read and re-read your Whitewash and Post Mortem books and I am still impressed with your work.
I have two reasons for writing to you this time:
1) Is there still something being done in the USA, I mean, there was a new official investigation out I don't know of any results.
2) I have come into possession of a (it seems to me) strange book by D.S. Lifton, called "Best Evidence". I am puzzled by the reproductions of so-called "Kennedy X-rays" in it. Could these be real X-rays of the President? Do you know the book? (I believe the fact about the empty casket is nonsense)

I hope you can let me know something and in the meantime I wish you and your wife all the best with whatever you are undertaking at the moment.

Yours Sincerely.
